## Wanin 734

### Product description

Wanin 734 is a spray dried sodium lignosulphonate.  
Typical Application: Water soluble dispersing agent. Raw-material for Tanning agents.

CAS No. 8061-51-6 (Sodium lignosulphonate)

### Specification

		Test Method
Dry matter [%]	min 93,0	A01
pH (10 % solution)	5,0 +/- 1,0	A04
Insolubles [%]	max 0,5	A13

### Typical Analysis\*

Chemical Data		Physical Data	
Sodium, Na [%]	6	Bulk density [kg/m <sup>3</sup> ]	500
Reducing sugars [%]	6		

\*The above analyses are not formal specifications and values may change.  
Chemical Data calculated on solids.

### Storage Stability:

Wanin 734 remains stable for several years if stored under dry conditions.

### Compatibility:

Lignosulphonates are compatible with anionic and non- ionic materials, dispersants, wetting agents and most organic and inorganic materials.

### Packaging:

25 kg bags, Big bags

### Lead Time:

Two weeks lead time is typical.

**Safety Data Sheets** are available upon request.

**Please contact your LignoTech Sales Representative for additional product information.**
